

Program Name: Hazardous Waste Enviroscope Grade(s): Sixth and High School
Model

Objectives:

Students will better understand:

- the difference between hazardous materials and waste
- where hazardous waste comes from
- how we are affected by hazardous waste contamination
- how to clean up hazardous waste contamination
- how we can prevent hazardous waste contamination

Description:

The Enviroscope Hazardous Waste Model demonstrates:

- potential sources and problems of hazardous waste contamination
- how to clean up hazardous waste sites
- how to prevent hazardous wastes from adversely affecting the environment.

The model is designed to help us understand hazardous substances, wastes and their effects of the environment.

Activities & Resources:

Hazardous Waste Enviroscope User' Guide

Model and supplies

SOL's:

6.9
BIO 18b

Format and Requirements:

Teachers may borrow the model for one to two weeks.
