

**Program Name: Water Cycle**

**Grade(s): Second**

**Objective:** The student will investigate and understand the water cycle and its relationship to life on Earth.

**Description:** The water cycle is an interactive program presenting information about the states of water, the water cycle, and water conservation. Students will get a chance to create a mini water cycle at their desks, and see how the instructor can make it RAIN in the classroom.

**Activities & Resources:**

Teacher resource notebook with lesson plans.

Activities:  
Water Cycle felt board  
How Much Fresh Water is there on Earth?  
Make a Water Cycle Wheel

Books:  
The Water Dance (hardcover)  
The Water Hole  
Splish Splash by Joan Bransfield Graham

**SOL's: PWC 2.5.2**  
The student will investigate and understand the water cycle and its relationship to life on Earth.

**Format and Requirements:**

District staff can present the program. Each classroom presentation (CP) is approximately 45 minutes in length.

Teachers may borrow the capsule for one week.
